

NOVA – Smoke & Regression Suites

Smoke Suite

Login, dashboard, create project, create task, assign task, change status, search task, logout.

Regression Suite

Authentication; profile/password; project CRUD/members; task
CRUD/assignment/priority/status/due-date/comments; dashboard counts; search/filters;
notifications; critical cross-browser/device flows.

Execution Rule

Run smoke for every build and regression after significant fixes/releases; record build,
environment, actual result and evidence.
