

NOVA – Test Plan

Objective

Test the fictional NOVA productivity platform before production for functional, UI, usability, API and regression issues, matching the supplied assignment.

Scope

Authentication; User Management; Project Management; Task Management; Dashboard; Search & Filters; Notifications; compatibility; API; basic automation.

Approach

Understand → Plan → Smoke → Functional → Exploratory/Negative → API → Regression → Compatibility/Accessibility/Performance → Report → Release recommendation.

Entry Criteria

Requirements and build available, test environment accessible, test data/accounts available.

Exit Criteria

Acceptance deliverables completed, critical/high risks reviewed, regression completed after fixes, residual risk documented.

Constraint

The supplied assignment does not provide a live NOVA URL/build, API contract or credentials. Therefore actual execution evidence and verified actual defects cannot be fabricated.
